UN 38.3
TEST PASSED

1. Increase Revenue

Increased revenue for dealers with a 35% margin and competitive lower pricing.

2. Longer Life

W-Standard Lithium Ion batteries last up to 5 times longer than conventional batteries delivering over 2000 cycles.

3. Ultra-Light

Extreme light weight means easy handling and installation with less added weight to the vehicle.

4. More Power

State-of-the-art technology deliver 5 times the cranking power consistently outperforming the competition.

5. Proven Performance

Exceeds international standards UN 38.3 for performance, safety, capacity, durability, vibration, quick charge, discharge and performance.

6. Compact Size

Ultra-small batteries come with flexible, adhesive backed foam cut outs to ensure a secure fit and added dampening.

7. Energy Saver

Industry leading low discharge rate and can sit for up one year without recharging. Full charge to maximum capacity in less than thirty minutes.

8. Safer Use

W-Standard Lithium Ion batteries contain no lead or acid and are a safer for riders, installers, vehicles and the environment.
